

BETTER CYCLING OPTIONS – SEAFORD

**!!!! CAN YOU HELP, WE NEED
YOUR VIEWS !!!!**

Seaford Community Partnership are working with the South Downs National Park and other stakeholders on a study into improvements to existing cycling routes in Seaford, or creating new ones.

We are interested to know local opinions on cycling experiences or barriers to cycling. As part of the study we want to gather the opinions of local people who cycle, as well as others who are interested to start cycling. We would like to know where you think changes are needed.

As a result of the pandemic and climate change issues, more people are interested in cycling. Previous reports identified the town as having poor connectivity for cyclists, please help us towards a better Seaford.

Use the link below or scan the QR code to access more information and complete the survey.
